

### **Video Scavenger Hunt**

**Equipment Required:** One phone or digital camera per team (with video recording function), Scavenger hunt lists (see example list that follows this activity in separate folder), Laptop and Projector for review playback.

**Space Required:** Depends on age and size of group.

**Group Size:** 4-8 in each group

**Skills: Communication, Leadership, Teamwork**

**Brief Overview:** Working in smaller teams, each team must record all the items listed on the scavenger hunt list within a set time period.

**Instructions:** Prior to the activity, create a challenge list of tasks for the teams to complete, and assign a point value for each task (see sample ideas in separate folder below this activity). Divide the group into teams of four to eight and give each team a camera, list, and a time to return. Each team is only allocated ten minutes of recording time for their video and must try to record as many different tasks as possible. The groups must return by the agreed-upon time (deduct points for each minute they are late) and hand over their video. Allow time to watch each group's video montage, and tally points as you watch the videos.

**Discussion points:**

- 1) Did someone in your group emerge as a leader? Was this helpful?
- 2) Did your group waste a lot of time trying to decide what to do next?
- 3) How did the team decide where to go and what to do? Did you split the team at any point?
- 4) What do you feel you took away from this task?
